

# [SIGHT PROTECTIVE COVER SYSTEM]

## Abstract

A sight protective cover system adapted for a target sight including a protective cover. The protective cover being a body having at least two L-shaped slots. Also, including a mounting section which has a protective cover insert extending outward from the mounting section and away from the target sight, where the protective cover insert is sized to fit inside the body of the protective cover. There are at least two studs extending from the protective cover insert to interact with the at least two L-shaped slots to lock the mounting section and the protective cover together. There is a spring member between the mounting section and the protective cover to provide tension between the at least two studs and the at least two L-shaped slots to aid in locking the mounting section and the protective cover together.
